THERMAL SOLUTIONS

SINGLE TUBE
HEAT EXCHANGERS

Kelvion Air Fin Cooler

TAKING OUT THE HEAT OF MAJOR INDUSTRIES

DESIGN & FUNCTION

Wherever cooling processes are required within your industrial production facilities, we regulate it all to a precise temperature. Oil, gas and chemicals, steelworks and power stations, from paper to textiles – Kelvion provides you with individual solutions throughout the world:

Air-cooled heat exchangers with aluminium (ALU) or hot dipped galvanized (HDG) tubes

Our portfolio includes all air cooler designs for all applications, starting with simple components and ending with complex process engineering.

Your benefits include: manufacturing quality, economic efficiency and flexibility – a winning combination in terms of efficiency.

WHY CHOOSE KELVION AFC?

- ▶ Enhanced technology
- ▶ Widest range of fin shapes, tubes, headers and materials
- ▶ Leading design and manufacturing technologies
- ▶ Complete service packages
- ▶ Fast delivery
- ▶ Long life cycle

OUR EXPERIENCE

15 AFC
PATENTS
SINCE 2007

OVER 120,000
TUBE BUNDLES
SOLD SINCE THE
1970'S

FIRST AIR FIN
COOLER
INSTALLED IN
1927

HIGHLIGHTS

DIESTA FINS (ALU)

- ▶ Capex savings
- ▶ Increased revenue
- ▶ Improve CO₂ footprint

GROOVY FINS (ALU)

- ▶ Enhanced thermal performance
- ▶ Capex / Opex savings
- ▶ Reducing plot area

EFFASY low noise fan

- ▶ excellent aerodynamic efficiency
- ▶ Lower Power consumption

CW TUBES (HDG)

- ▶ Enhanced thermal performance
- ▶ Low operating expenses
- ▶ Low CO₂ emissions
- ▶ Low noise emissions

TUBES

We offer a choice of aluminum finned tubes or hot dip galvanized steel finned tubes. Tube bundles with aluminum finned tubes are considerably lighter, insensitive to soiling and easy to clean. The galvanized steel systems offer a very long service life of up to 30 years and are extremely resistant to rough weather conditions.

HEADERS

At each end of the bundle, the medium to be cooled is distributed across the tubes by the headers.
