THERMAL SOLUTIONS

Kelvion Thermal Solutions Service

OUR SERVICE FOR COOLING TOWERS

YOUR COOLING TOWERS IN PEAK CONDITION

KTS designs, produces, installs and maintains innovative and high-quality cooling towers for process and climate cooling. Our brand has been synonymous with optimum reliability for all types of cooling towers. Our service organization ensures that your cooling towers remain in peak condition at all times.

We provide excellent service to ensure that your cooling towers operate smoothly for many years, regardless of type or brand. We understand that downtime is not an option for your business processes. Regular maintenance and short turnaround times in case of emergency intervention keep these downtimes to a minimum. We ensure that your cooling towers are immediately operational again in the event of a malfunction or emergency.

ALL BRAND SERVICE

Besides being experts in our own products and our former brands, we also have the expertise to service other brands.

YOUR TOP 5 CHALLENGES

AVOID UNSCHEDULED DOWNTIME

PREVENT CAPEX INVESTMENTS

INCREASE PROCESS EFFICIENCY

MANAGE THE VARIETY OF BRANDS

HAVING THE RIGHT MAINTENANCE SKILLS

SERVICE PORTFOLIO – COOLING TOWERS

START-UP & ONSITE SERVICES

- ▶ Fan balancing / Vibration measurements
- ▶ Alignment gearbox
- ▶ Noise reduction

SPARE PARTS & SPARE PART SOLUTIONS

- ▶ Wide range of competitively priced spare parts
- ▶ Quickly delivery to your technical department
- ▶ Onsite support by a Kelvion technician to install the spare part

UPGRADES & REPLACEMENTS

- ▶ Replacement of cooling packages due to fouling, brittleness or aging
- ▶ Replacement of drives
- ▶ Coordination, planning and supervision of projects

REPAIRS, OVERHAULS & MAINTENANCE

- ▶ Annual inspection and maintenance contribute to optimal and safe operation of your cooling towers

- ▶ Cleaning of cooling towers

MONITORING, CONSULTING & TRAINING

- ▶ Check of the condition of the mechanical and hydraulic parts during inspection-maintenance intervals
- ▶ Check of water quality

MAINTENANCE AND INSPECTIONS

KTS has more than thirty years' experience in the maintenance of cooling towers. We work in accordance with the requirements described by ISO, VCA, VDMA, CTI and Eurovent. KTS can carry out the maintenance needed in virtually every location and in practically any time frame. Kelvion service organization guarantees optimal performance at minimal cost according to your wishes, whether the maintenance is scheduled or corrective, with or without a contract, and independent of brand or version. If an overhaul or revamp is needed, KTS can take care of the complete implementation (for example including the removal and disposal of asbestos). We can limit the operating stop to an absolute minimum through thorough preparation. The result is always "as good as new".

Periodic inspections are the instrument for assuring yourself of problemfree cooling tower operation. KTS offers a choice of two service models:

- ▶ In the case of clients with an inspection contract, our experts check the cooling towers, record their findings in a detailed report and make maintenance recommendations on that basis.
- ▶ Where the customer has a periodic inspection and maintenance contract, we take care of all the maintenance. This is a comprehensive solution where we adapt our maintenance programme to meet your requirements and your schedule, as set down in clear agreements.
