# JOB OFFER PMO PROJECT MANAGER

## WELCOME IN KTS

We are the technology market leader in the global heat exchanger industry. Since 1920, we have been manufacturing heat exchangers for almost every conceivable industrial application and offer customised solutions for even the most complex environmental conditions.

As PMO Project Manager, you will play a pivotal role in Kelvion's business development and strategy deployment. The projects and initiatives center around developing and/or growing strategically important markets, including product and application engineering, commercialization and marketing, capacity expansion and supply chain optimization. Also business analysis and assessment of improvement opportunities is included in the scope of work. You are part of a dynamic team of functional specialists, delivering the project objectives in a controlled and timely manner.

## REQUIREMENTS

- Experience of project and program management methodologies and processes in manufacturing companies
- Good understanding of the business and experience in analyzing business needs
- Knowledge of operational and supply chain processes
- Ability to optimize processes and their costs
- Leadership and coaching skills
- Fluent English language
- MS Office (Word, Excel, Powerpoint, Projects), data management and data analysis tools, preferably experience with major ERP system

## RESPONSIBILITIES

- Proactive management of sub-projects with focus on ensuring and evaluating measurable results
- Responsible to ensure consistency of action plans and planned results across sub-projects and during the course of the program
- Intensive exchange and coordination of project contents with involved corporate functions (e.g. controlling)
- Content-related "sparring" regarding the project progress with involved stakeholders
- Development and preparation of regular (interim) presentations of results for the executive board and for the Program Steering Committee
- Development and enforcement of countermeasures when deviation from budget is foreseeable
- Particular challenges including conflict management, detection of correlations and performance risks across sub-projects
- Challenge developed contents and support implementation
- Provide best practices and align with internal as well as external experts
- Creation Investment proposal (Capex) and business case justification
- Administration of PMO Tool

## OFFER

- Full-time and longterm cooperation
- Competitive salary
- Technical trainings, certificates, and upskilling if needed
- Employee benefits package
